

CAREER SUMMARY

Resourceful Full-Stack Developer with 6+ years of experience designing, developing, and maintaining web applications across front-end and back-end stacks. Proven expertise in building scalable, responsive, and user-friendly applications using Vue.js, PHP (Laravel & CodeIgniter), PWA, and database systems such as MySQL and PostgreSQL. Strong background in deploying and supporting live production systems, collaborating with clients and integrating APIs. Passionate about clean code, performance optimization, and continuous learning.

NOTABLE PROJECT

-Parking Management System

CodeIgniter, Bootstrap 3, MySQL

Developed a role-based web application to manage parking operations, including real-time slot tracking, event and vehicle management, automated fee calculation, and admin/user control features.

-Learning Management System – Student Module

CodeIgniter, Bootstrap 5, MySQL

Built the student module for account management, course enrollment, and access to learning materials. Also designed a marketing site aligned with branding and user engagement goals.

-Cooperative Management System

Laravel 8, Vue.js, Vuetify

Created a role-based system for managing employment records, salary computations, and government contributions. Developed a PWA with payment API integration for streamlined loan applications and repayments.

WORK EXPERIENCE

Senior Developer | OnlineThinkers Technology, Valenzuela City, Metro Manila | May 2023 - Present

- Maintain hosting and provide ongoing website support
- Create project specifications and timeframe
- Design and develop web applications from scratch
- Deploy full web solutions and troubleshoot issues
